Commission on the Poor Laws and Relief of Distress will be
found at the end of this Volume.

PART I.

PERSONS RELIEVED DURING A WHOLE YEAR (IRELAND).

RETURN showing for each Province in Ireland :—

- (1) The number of men, women, and children respectively (excluding tramp night lodgers), who were in receipt of Poor Law Relief at any time during the year ending the 31st day of March, 1908;
- (2) The number of such men, women, and children respectively, who were (a) persons relieved singly, (b) heads of families, (c) dependants of paupers;
- (3) The number of such men, women, and children respectively, who received (a) indoor relief only, (b) outdoor relief only, (c) both indoor and outdoor relief;
- (4) The total number of persons included in (1), classified according to the aggregate length of time during which they received relief; and
- (5) The number of persons in each of the classes indicated in (4), re-classified according to the number of times on which relief was granted.

(Summary Table on pp. 2 to 7, re-printed from H. C. 306 of 1908.)

TABLE No. I.—Population of Ireland at Census of 1901, and estimated to middle of 1903, in Age Groups corresponding to the Age Groups adopted for the Census of Paupers, March 31st, 1906	16
TABLE No. II.—Ages of Persons in receipt of Indoor and Outdoor Relief on March 31st, 1906 (not including Tramps or Night-Lodgers)	16
TABLE No. III.—Ages of Persons relieved in Institutions on March 31st, 1906 (not including Tramps or Night-Lodgers)	17
TABLE No. IV.—Ages of Persons relieved otherwise than in Institutions on March 31st, 1906	17
TABLE No. V.—Ages of Persons relieved in Workhouses on one day in the Years 1881, 1891, 1901, and 1906	18
TABLE No. VI.—Occupations or former Occupations of Male Paupers aged 16 Years and upwards for the whole of Ireland	19
TABLE No. VII.—Occupations or former Occupations of Female Paupers aged 16 Years and upwards for the whole of Ireland	21
TABLE No. VIII.—Showing the Population of each County in Ireland, and the whole of Ireland, in three Age Groups, the proportion of the Population in each Age Group, and the number of Paupers (other than Tramps or Night-Lodgers) on March 31st, 1906, at each Age Group per 1,000 of the population of the same ages	22
TABLE No. IX.—Number of Indoor and Outdoor Paupers in Ireland in the various Age Groups, distinguishing Able-Bodied and not Able-Bodied, and Male Adults, Female Adults, and Children	24
TABLE No. X.—Number of Paupers in various Age Groups in each registration County in Ireland	25
TABLE No. XI.—Number of Paupers in various Age Groups in each Poor Law Union in Ireland	26

ROYAL COMMISSION ON THE POOR LAWS AND RELIEF OF DISTRESS.

MEMORANDUM ON CENSUS OF PAUPERS, MARCH 31st, 1901.

IRELAND.

(1) AVAILABLE STATISTICS OF PERSONS
RELIEVED IN IRELAND.

1. In Ireland, as in England and Wales, statistics of pauperism are obtained for each Saturday throughout the year. But there is an important difference between the two series. The Irish statistics follow a more elaborate classification than the English weekly statistics, and in this respect they more nearly resemble the English half-yearly returns.

2. At the time of the appointment of the Commission the statistical material available was such as was contained in the Annual Reports of the Local Government Board for Ireland, and as it was considered desirable to obtain fuller statistics for each union, and especially of the ages of the persons relieved, it was decided to extend to Ireland the Census of Paupers of March 31st, 1901. By this means comparable statistics would also be obtained for the three divisions of the United Kingdom.

3. After the Census was taken however, the Report of the Vice-Regal Commission on Poor Law Reform in Ireland was presented to Parliament, and the Appendix to that Report contains a considerable volume of statistics of poor relief for various dates and periods in the years 1894 and 1901. In the main the classification adopted for those statistics followed the lines of that used in the weekly returns, but with considerable expansion and with much fuller details regarding the sick. The number of men and persons in receipt of outdoor allowances of various amounts was also included in these statistics. But no statistics of the ages of the persons relieved were obtained, except in regard to children in workhouses or boarded out.

4. Still later, Mr. Edmund Beattie, one of the Poor Law Inspectors for the Local Government Board for Ireland, furnished the Commission with a series of Tables, giving the same details for each union as those published by the Local Government Board for each Saturday for the whole of Ireland, and the classification was again slightly extended. Mr. Beattie also put in some valuable Tables dealing retrospectively with pauperism in Ireland.

5. And, finally, the Local Government Board for Ireland obtained, at the request of the Commission, a return showing the number of persons relieved in each union during the year ended March 31st, 1900, and the period and recurrence of the relief. This Return has been published as a Parliamentary Paper (H.C. 305 of 1900) and the Summary Table is printed in this Volume on pp. 2 to 7.

6. It is not proposed here to review all this statistical material, but reference may be made to some of the information in the course of the examination of the results of the Pauper Census of March 31st, 1901.

(2) FORM AND SCOPE OF THE PAUPER CENSUS.

7. The forms used in Ireland were identical with the English forms, a copy of which is included in the Statistical Appendix, Volume XXV., to the Report, for England and Wales. Briefly, the information for which the guardians were asked included the ages and occupations or former occupations of the persons relieved, and the form in which the relief was given. The guardians were also asked to classify the persons relieved according to a classification based partly on family relationship, partly on physical and mental condition, and partly on the course which led to the application for relief.

(3) THE PERSONS COUNTED AS PAUPERS.

8. The practice in regard to the persons counted as paupers appears to be similar in Ireland to that in England. When out-relief is given to the head of a family, the whole of the members are counted as paupers, but when a member of a family is relieved in an institution so other members of the family are counted unless they also are in receipt of relief.

9. Children are so claimed until they attain the age of fifteen, after which any relief given would be considered as given to them on their own account. In England the corresponding age is sixteen, in Scotland, it is fourteen.

10. Every person relieved is counted although the whole cost of the relief may be repaid.

(4) TOTAL NUMBER OF PERSONS RELIEVED.

11. Returns were obtained by the Commission from all the unions in Ireland with the exception of Rathdown. From the Barmby Union no Returns as to outdoor relief were received. The number of persons omitted on this account from the Census results is probably about 1,250 or $1\frac{1}{2}$ per cent.

12. Pauperism reached its maximum in Ireland shortly after the end of the famine of 1846-7. In the year 1848-9 the mean number in receipt of relief was equal to 1 in 10 of the population. This proportion, however, rapidly diminished with the succeeding agricultural prosperity, and reached its minimum in the years 1858-60, when the mean number was equal to 7 per 1,000 of the population. The period that has since elapsed may, from the statistical point of view, be divided into two periods. From 1861-2 to 1879-80 the mean numbers varied from 61,000 to 66,000, and the proportion to population from 11 to 18 per 1,000. The reductions in the severities which took place in England and Scotland did not extend to Ireland, and during that decade the Irish rate was gradually rising. Since 1879-80 the mean numbers have varied from 67,000 to 114,000, and the proportions from 21 to 25 per 1,000. The Census was taken on March 31st, 1901, the night between the two fabled years 1900-1 and 1901-2, when the rates were 24 and 23 per 1,000 respectively. The general level of pauperism at the time the Census was taken was thus about the normal level of recent years. (See Appendix No. 1. (G) to Mr. Beattie's Evidence.) In relation to the seasonal fluctuations in pauperism, however, the date was not far removed from the maximum period. The highest point is generally reached about the end of February.

13. The total number of persons in receipt of relief on March 31st, 1901 were 101,704, or 23.2 per 1,000 of the estimated population in the middle of that year. The corresponding rate in England and Wales was 24.0 per 1,000. In comparing the two figures it should be remembered that a considerable amount of medical relief is given in Ireland under the Medical Charities Acts independently of the Poor Law. If the cases receiving "medical relief only" in England and Wales be deducted from the total the proportion of paupers to population would be much the same in both countries.

14. Omitting casuals, the number of men, women, and children under sixteen was:—

	Number.	Proportion to estimated population.
		<i>Per 1,000.</i>
Men	27,814	18.0
Women	47,780	31.0
Children under 16	28,168	18.4
	103,822	27.0

15. The rates for men and children do not differ very materially from the corresponding rates for England and Wales, but the rate for women is appreciably higher in Ireland than in England and Wales or in Scotland.

(3) **AGES OF PERSONS IN RECEIPT OF RELIEF.**

16. A Table (No. II.) is attached to this Memorandum

	Adults under 60.	Adults over 60.
	<i>Per 1,000.</i>	<i>Per 1,000.</i>
Men	7.7	74.8
Women	11.9	131.3
Total	9.0	103.2

17. Here again, the rates for adults under sixty are very similar to the corresponding English rates. The rates for adults over sixty are, however, much below the English rates. Though they are not as low as the Scottish rates, it is probable that the circumstances which lead to a low rate of aged pauperism in that country, are also the cause of the comparatively low rates of aged pauperism in Ireland. In Ireland agriculture provides a living for a much larger proportion of the population than it does in England and Wales, and it is possible for people following that occupation to continue at work till a later age than people engaged in other industries. The system of land tenure is also the means of keeping down the rate of aged pauperism for the aged pauper continues to dwell on the farms of their sons and daughters though able to perform little or no work. Moreover, the standard of living in the western parts of Scotland and Ireland is much lower than in any part of England and Wales, and aged people in the former countries may often obtain from the charity of their neighbors or in other ways, an income on which they can live, but on which it would be impossible to live in England and Wales.

18. The points to be noticed in the more detailed Table (No. II.) in the Appendix are similar in many respects to those found by the examination of the English and Scottish statistics. There is the increasing rate for children from infancy to the age at which they commence work, and for adults as age advances. And there is the drop in the rate for women at ages forty-five to fifty-five, produced by widows previously in receipt of relief becoming independent as their children grow older.

19. A somewhat remarkable distinction between the Irish rates of aged pauperism and the corresponding English and Scottish rates may, however, be noticed. In England and Scotland the rate increases without interruption, but in Ireland the rates for persons over eighty years of age appear to be lower than those for persons aged seventy-five to eighty. It seems unlikely that this can be correct and it is probably the result of some defect in the age statistics of persons relieved and of the aged population generally, owing to the absence, until 1864, of a complete system of the registration of births.

(4) **THE METHOD OF RELIEF.**

20. The persons in receipt of indoor relief and outdoor relief respectively numbered:—

Indoor relief	44,513
Outdoor relief	59,346
Total	103,859

classifying the persons relieved according to age, and giving the proportions per cent. of the population in each age group. Separating the adults over sixty from those under sixty, it is found that the rates were as follows:—

21. It may be remembered that more than four-fifths of the persons relieved in Scotland, and more than two-thirds of those relieved in England and Wales, were in receipt of outdoor relief in 1869. In Ireland the corresponding proportion is only 55.8 per cent. The indoor system is thus more frequently used in Ireland than on the other side of the Channel. The reason for this difference may be found in the history of out-relief in Ireland. Under the Poor Relief (Ireland) Act, 1838, relief could only be given in the workhouse. During the famine period of 1846-7, this limitation could no longer be maintained and the Poor Relief Extension Act, 1847, legalized out-relief to destitute persons disabled by old age, infirmity, sickness, or serious accident, and to widows having two or more legitimate children dependent on them. To other classes out-relief might also be given in the event of the workhouse being full or unfit, through the existence of fever or other infectious diseases within them, for the reception of poor persons, but this provision was subject to the sanction of the Local Government Board, and to the observance of stringent conditions. By the same Act of 1847, relief either in or out of the workhouse was prohibited to any person in occupation of more than a quarter of an acre of land, but the prohibition was repealed in 1862 so far as it related to relief in the workhouse, and it now applies only to outdoor relief. At various subsequent periods, e.g. in 1882, 1886 and 1894, it was found necessary to relax the restrictions upon out-relief, and in 1888 permanent provision was made enabling out-relief to be granted to poor persons of any description in times of exceptional distress, if the county council are satisfied as to the existence of the distress, and the Local Government Board approve.

22. The statistics illustrate in a graphic manner the effect of these provisions. After the legislation of out-relief to certain classes in 1847 the number of outdoor paupers rose to a great height. The average number in the year 1849-50 was 522,038. Just as rapidly, however, the number fell, with the return of agricultural prosperity, and in 1850-1 the average number was only 8,126. During the intervening period the workhouse accommodation had been enormously extended, and the numbers receiving indoor relief did not fall away so quickly. Sir George Nicholls remarks that the provisions relating to out-relief were regarded as exceptional, and that the workhouse had "never perhaps commanded more general assent, than at the time when a departure from it was thus sanctioned." By the year 1855-6 the average number of outdoor paupers had fallen to 885. It was then at its minimum. With one exception, every subsequent year until 1881-2 showed an increase, until the average number had reached 40,000 in 1878-80. After the passing of the temporary enactment of 1880 enabling out-relief to be granted to all classes of poor

presents the average number rose to 61,000 (1880-1), and since then the average number has never fallen below 54,000. "Though an effort was made to recover the lost ground in 1889, it was not followed up, and the workhouse test was never again rigidly enforced in periods of agricultural depression." (Report, Part B.)

23. Since the great famine of 1846-7 the average number relieved indoors has varied very little. It fell to 43,886 in 1855-6, and since that year it has only varied between 49,000 (1893-4) and 56,000 (1902-3.) (See Appendix No. 1. (G) to Mr. Bourke's Evidence.)

24. Notwithstanding the continuous increase in out-relief which occurred between 1880 and 1890, and the comparatively stationary number of persons relieved indoors, the proportion of outdoor paupers to indoor paupers is, as has been shown, still lower in Ireland than in England and Wales, or Scotland, where out-relief has always preponderated.

25. Tables are attached (Nos. III. and IV.) which classify the indoor paupers and outdoor paupers, respectively, according to age, and give the rates per 1,000 of the estimated population in each age group. It may be observed that the progressive increase in age advances in the proportion of children relieved occurs wholly amongst the outdoor children. The risk of widowhood increases as the children grow older, and the increasing ratio amongst the outdoor children is clearly due to this cause. And it may also be observed that the drop in the proportion of women relieved at ages forty-five and fifty occurs wholly amongst the outdoor paupers. There would be no special reason why widows suffered in institutions should regain their independence at those ages, for they would generally be without children, or be suffering from some infirmity or sickness.

26. The number of children in the Trist and Glen District Schools was 320, and their ages were:—

8 years and under	5 years			11
5	"	"	"	103
10	"	"	"	87
13	"	"	"	29
14	"	"	"	19
15	"	"	"	32
16	"	"	"	29

316

(7) AGES OF WORKHOUSE INMATES.

27. Table V. classifies the inmates of the workhouses in Ireland on 31st March, 1906, according to age, and gives corresponding figures for the years 1881, 1891, and 1901 compiled from the Reports of the Decennial Censuses of those years. The proportions per 1,000 of the population in the same age groups are also given.

28. It will be seen from this Table that indoor relief was at a higher level in 1881 than in the other years included in the Table. The distress of 1879-80 had caused a considerable increase in pauperism, and notwithstanding the relaxation of the restrictions on outdoor relief large numbers were relieved in the workhouses. For this reason the comparison between the figures of 1881 and those for the other years should be made with caution.

29. The most striking feature of the Table is the very large increase in the proportions of the aged population who are in the workhouses. Even when compared with the figures for 1881 the proportions in 1905 show considerable increase. As already stated, however, the Irish proportions are still below the English proportions.

30. Regarding adults under sixty-five years of age the proportions have moved more closely with the general movement in indoor pauperism, but there is some evidence that the changes in the proportions for adults aged

thirty-five to sixty-five have not been so favourable as those for adults under thirty-five. There has been some increase since 1891 in the proportion of children relieved indoors to the child population.

(8) GEOGRAPHICAL DISTRIBUTION OF PAUPERISM.

31. In Table VIII., the proportion of the population (1901) in three age groups and the proportion of paupers to population in the same age groups, are given for each county. The variation in the proportion of the total number of paupers to the total population is nearly as wide as in Scotland, the limits being 8.2 per 1,000 in Co. Londonderry, and 40.9 per 1,000 in Co. Limerick. To a great extent the variations are the result of the unequal distribution of the aged population. For instance, it would be expected that Co. Longford, with 135 persons aged sixty and upwards amongst each 1,000 of its population would have a higher rate of pauperism than Co. Antrim which has only 77 persons aged sixty and upwards in each 1,000 of its population. The rate of pauperism in Co. Longford was 33.2 per 1,000; in Co. Antrim it was 13.3 per 1,000. But the rate of pauperism in the different counties does not always vary directly with the proportion of aged persons in the population. For Co. Monaghan, with 136 persons aged sixty and upwards, per 1,000 of the population, has a rate of pauperism (12.2 per 1,000) less than half that of Co. Dublin, which has only 72 aged persons per 1,000 of its population. The proportion of aged persons to the aged population varies considerably, Co. Londonderry having an aged pauperism rate of only 29.3 per 1,000, whilst Co. Limerick has a corresponding rate of 178.7 per 1,000. Generally speaking, the aged pauperism rate is higher in the southern counties than in the northern counties, and this is also the case with the rates of pauperism for other adults and for children.

32. The more unsatisfactory condition of the southern Provinces in this respect is also shown in a Table put in by Mr. Bourke (see Appendix No. 1. (A) to his Evidence), in which it is shown that, on June 30th, 1905, the rate of pauperism was 3.0 per cent. in Leitrim, and 3.1 per cent. in Monaghan, whereas it was only 1.8 per cent. in Connaught and 1.2 per cent. in Ulster. In the same Table Mr. Bourke has also shown the valuation per head of the population, and it is remarkable that Leitrim with the highest valuation per head (£4 7s.) has almost the highest rate of pauperism, whilst Connaught, with the lowest valuation per head (£2 6s.) has a comparatively low rate of pauperism. It may also be observed that the two southern Provinces have a high proportion of outdoor paupers to indoor paupers. Ulster, with the lowest rate of pauperism, has about equal numbers of outdoor and indoor paupers, but Connaught, on the other hand, has the highest proportion of outdoor to indoor paupers, and seems to be an illustration of a low rate of pauperism coupled with administration on out-relief lines.

(9) OCCUPATIONS OF PERSONS RELIEVED.

33. In Tables VI. and VII., adults in receipt of relief on March 31st, 1906, are classified according to the occupation they then followed, or had previously followed. Upwards of one-half of the men in receipt of relief were or had been agricultural workers or casual labourers. A considerable number are also shown under the heads of "Building Trade," "Conveyance," "Dress," and "Flax and Linen Manufacture."

34. Amongst women the principal occupations followed or previously followed were domestic service, charring, agriculture, dress, and flax and linen manufacture. In the case of charrwomen, agricultural workers, and shirt-makers, the outdoor paupers are in a considerable majority. In these occupations relief would thus appear to be given to a large number of women who are earning.

35. In the following sections a few of the principal figures relating to the various classes of paupers will

be given, with references to the more detailed Tables of statistics relating to each class:—

(10) WIDOWS.

36. The statistics of the number of widows in receipt of relief are not complete. The total number relieved in institutions on March 31st, 1906, was 5,000 classified as follows:—

Able-bodied widows—	
In health	380
Temporarily disabled	271
Widows not able-bodied	4,349
Widows, lunatics or idiots	339
	<hr/> 5,000

Of the widows in receipt of outdoor relief the Census only shows the number of able-bodied widows, and these numbered 4,349, and had 8,710 children dependent on them. The ages of these widows, indoor and outdoor, are given in Table IX.

37. The Vice-Royal Commission on Poor Law Reform also obtained statistical information as to widows in receipt of relief. (See Appendix to Report CM. 3003, pp. 16-24.) On March 11th, 1905, the number of "widows of good character with only one child" in the workhouses was only sixty. The number of "able-bodied widows having two or more legitimate children dependent on them" was 2,799, and the number of their dependent children was 2,175. (*Ibid.*, pp. 27-33.) By comparison with the Census figures it would appear that upwards of 1,000 able-bodied widows with no legitimate children or only one legitimate child receive outdoor relief, probably on account of sickness.

(11) THE AGED.

38. There were 50,687 persons over sixty years of age in receipt of relief on March 31st, 1906. Nearly two-thirds of these were women and rather more than one-third were men. The numbers are classified in six groups of ages in Table II. to IV. Aged women requiring relief are more frequently given outdoor relief than indoor relief, but aged men more frequently receive indoor relief.

39. The number of paupers over sixty years of age represented 103.2 per 1,000 of the population of the same ages. The increase in the rate of aged paupers to aged population has already been mentioned.

(12) CHILDREN.

40. On March 31st, 1906, there were 35,168 children under sixteen years of age (other than orphans) in receipt of relief, and of that number 9,066 were relieved in institutions, and 26,102 were otherwise relieved. The ages of these are shown in Tables II. to IV., and further details are given in Table IX. From the latter Table it will be seen that upwards of one-third of the total number of pauper children are the children of able-bodied widows in receipt of outdoor relief, and that one-fourth are orphans or other children relieved without parents.

41. In paragraph 29 the number and ages of children in district schools were given.

42. The number of children in certified schools on March 31st, 1906, was only thirty-seven, of which number thirty-two were girls. (See Report of Local Government Board for Ireland, 1906-7, p. 228.)

43. The number boarded out or out at nurse on the same date was 2,408. Of that number 1,396 were boys and 1,027 were girls. (*Ibid.*) Very few of these children are under two years of age. (See Appendix to Report of Vice-Royal Commission, p. 119.)

44. The number of children over whom the Guardians assumed control under the Poor Law Act, 1899, during the year 1904 was 276, of whom 180 were boys, and 96 were girls. (*Ibid.*)

45. A considerable reduction has taken place in the numbers of children under fifteen years of age in workhouses. Excluding children in the workhouse hospitals

the numbers at intervals of ten years have been—(See Appendix No. I. (F) to Mr. Bourke's Evidence):—

January 3rd, 1839	36,261
" 4th, 1842	33,722
" 6th, 1852	32,423
" 7th, 1862	31,413
" 2nd, 1892	4,534
" 4th, 1902	3,724

(13) THE ABLE-BODIED.

46. The number of able-bodied persons in workhouses was formerly shown in a separate heading of the Returns. Many of these persons were not in reality able-bodied, and in 1908 the headings of the Returns were altered so as to show the number of "Sick," "Aged and infirm," "Lunatics," "Children," "Mothers with infants" and "All other classes." The numbers appearing under the last mentioned heading may be regarded as the number of able-bodied. In 1908 Vice-Royal Commission on Poor Law Reform obtained certain information relating to this class, and the number of able-bodied persons in receipt of both indoor and outdoor relief was shown by the Census of Paupers of March 31st, 1906. There is some reason to doubt the complete accuracy of the last-named Return, but, taking the whole of Ireland, the results probably give a general idea of the magnitude of this class.

47. The number of able-bodied men and women in health relieved in institutions on March 31st, 1906, was (see Table IX):—

Men	1,892
Women	2,224
	<hr/> 4,116

Of these numbers 282 men and 163 women were over sixty years of age. In the case of outdoor paupers, wives took the same classification as their husbands in the Census Returns, and it is not possible, therefore, to give the total number of able-bodied women in receipt of outdoor relief. Moreover, of the other women receiving outdoor relief who were ordinarily able-bodied a proportion would be sick, but such persons were not shown separately. With these explanations the following figures may be given:—

Outdoor able-bodied male paupers:

Relieved on account of sudden and urgent necessity	62
Sickness, etc., of family	179
Want of work or other causes	351
	<hr/> 416

Outdoor able-bodied female paupers:

Wives of able-bodied men in receipt of outdoor relief	1,298
Widows	4,136
Single women without children	1,181
Mothers of illegitimate children	15
Wives of non-resident men	91
	<hr/> 6,724

48. The Vice-Royal Commission found that there were 1,312 able-bodied men in the workhouses on March 11th, 1905, but "ins-and-outs" and sane epileptics were not included in that figure. (See Appendix to Report, pp. 9-15.) Any of these classes who were able-bodied would have been classed with the able-bodied in the Census Returns. Of able-bodied women the Vice-Royal Commission found there were 1,462 in the workhouse on March 11th, 1905, but women who entered to have, or with, an illegitimate child as well as "ins-and-outs" and sane epileptics, were omitted from that class. Some interesting particulars are given in the Tables containing these particulars of the occupations and characters of the able-bodied inmates of workhouses. (*Ibid.*, pp. 17-25.)

49. From the Tables put in by Mr. Bourke (see Appendix No. I. (F) to his Evidence) it appears that, whilst the numbers of able-bodied men in workhouses has not varied much during the last thirty years, the number of able-bodied women in workhouses has considerably diminished. The following are the numbers at decennial intervals:—

	Men.	Women.
January 3, 1858 - - - -	16,194	37,083
" 4, 1862 - - - -	3,480	6,194
" 6, 1875 - - - -	2,363	5,197
" 7, 1881 - - - -	3,378	5,394
" 3, 1902 - - - -	3,319	3,690
" 4, 1905 - - - -	2,280	2,672

(14) THE SICK.

50 The Census Returns only give partial information regarding the sick. Of the ordinarily able-bodied persons in the workhouses on March 31st, 1906, there were 2,079 men who were temporarily disabled, and 1,648 women temporarily disabled. Of the ordinarily able-bodied men in receipt of outdoor relief, 1,376 were relieved on account of their own sickness or accident. (See Table IX.)

51 More complete information regarding the sick is, however, given by the Local Government Board and by the Viceregal Commission. The Local Government Board show that the average daily number of the sick poor in infirmaries or hospitals connected with the workhouses was 14,845 in the year ended September 30th, 1905. Of that number about 500 appear to be fever patients. About 300 pauper patients are to be found at any one time in hospitals not connected with the workhouses. (See Report of Local Government Board for Ireland, 1905-6, pp. xviii and 226-8.)

52 The Viceregal Commission found that the number of outdoor adult male paupers relieved in cases of their own sickness or accident was 1,717 on March 11th, 1903, and that the corresponding total for women was 1,093. (See Appendix to Report, pp. 26-33.) That Commission also gave comprehensive statistics as to the nature of the diseases from which sick paupers in workhouse infirmaries, fever hospitals, and extern hospitals were suffering. (Ibid., pp. 60-75.)

53 Whilst the number of sick persons in workhouse hospitals and infirmaries moves up and down with the corresponding movement in indoor pauperism generally, the number has not materially changed during the last fifty years. Dr. Stafford put in a Chart (No. IV.) showing the number on first Saturday of January in each year from 1838 to 1907, and the average daily number for the years 1822 to 1906.

The following figures are taken from that Chart:—

PERSONS IN WORKHOUSE HOSPITALS AND INFIRMARIES.

Year.	Number on 1st Saturday in January.	Average Daily Number.	Percentage of Average Daily Number on Population.
1838 - - - - -	18,929	17,567	27
1866 - - - - -	17,643	17,626	30
1875 - - - - -	16,587	16,323	30
1886 - - - - -	17,430	17,344	33
1896 - - - - -	17,203	16,688	33
1906 - - - - -	14,805	14,611	32

54 The medical treatment of the outdoor sick poor (whether in receipt of other forms of poor relief or not) is provided for by the Medical Charities Acts. Under these Acts 542,614 new cases were attended and registered during the year ended March 31st, 1906, and of that number 481,029 attended at the dispensaries and 161,085 were attended at their own homes. (See Report of Local Government Board for Ireland, 1905-6, p. xxi.) Dr. Stafford also put in Charts (Nos. I. to III.) showing the changes in the numbers during the years 1853-1907. From 1843-1861 the numbers tended to decrease. Since 1861 there has been an appreciable increase.

(15) TRAMPS ON NIGHT LODGERS.

55 The average number of tramps or night lodgers at the close of each week during the year ended March 31st, 1909 was 984, and the weekly average number of admissions during the same year was 4,973. (See Report of Local Government Board for Ireland, p. xix.) Much the greater proportion of this class are men. (Ibid., pp. 232-3.) From a Table put in by Mr. Bourke it would appear that the number of tramps has been increasing since the year 1900. (See Appendix No. I. (E) to Mr. Bourke's Evidence.)

SUMMARY TABLES.

TABLE I.—POPULATION OF IRELAND AT CENSUS OF 1901, AND ESTIMATED TO MIDDLE OF 1906 IN AGE GROUPS CORRESPONDING TO THE AGE GROUPS ADOPTED FOR THE CENSUS OF PAUPERS, 31ST MARCH, 1906.

Age Groups.	Males.		Females.		Total.
	Census of 1901.	Estimated to middle of 1906.	Census of 1901.	Estimated to middle of 1906.

APPENDIX VOL. I. A.—ENGLISH OFFICIAL EVIDENCE.

Appendices to the Minutes of Evidence included in Vol. I., being mainly the evidence of the Officers of the Local Government Board for England and Wales.

APPENDIX VOL. I. B.—INDEX.

Index to Appendix Vols. I. and I. A.

APPENDIX VOL. II.—LONDON EVIDENCE.

Minutes of Evidence (with Appendices) mainly of London witnesses. 35th to 40th Days: 23rd May to 22nd July, 1906: Questions 14,881 to 24,729.

APPENDIX VOL. II. A.—INDEX.

Index to Appendix Vol. II.

APPENDIX VOL. III.—ASSOCIATIONS AND CRITICS.

Minutes of Evidence (with Appendices) mainly of critics of the Poor Law and of witnesses representing Poor Law and Charitable Associations. 49th to 71st Days: 1st October to 17th December, 1906: Questions 24,730 to 26,480.

APPENDIX VOL. III. A.—INDEX.

Index to Appendix Vol. III.

APPENDIX VOL. IV.—URBAN CENTRES.—LIVERPOOL, MANCHESTER, WEST YORKS. AND MIDLANDS.

Minutes of Evidence (with Appendices) containing the oral and written evidence of the British Medical Association and of witnesses from the following provincial urban centres—Liverpool and Manchester districts, West Yorkshire, Midland Towns. 72nd to 80th Days: 14th January to 28th March, 1907: Questions 26,481 to 48,947.

APPENDIX VOL. IV. A.—INDEX.

Index to Appendix Vol. IV.

APPENDIX VOL. V.—URBAN CENTRES.—SOUTH WALES AND NORTH EASTERN COUNTIES.

Minutes of Evidence (with Appendices) containing the oral and written evidence of witnesses from urban centres in the following districts:—South Wales and North Eastern Counties, 90th to 94th Days: 16th April to 30th April, 1907: Questions 48,948 to 53,667.

APPENDIX VOL. V. A.—INDEX.

Index to Appendix Vol. V.

APPENDIX VOL. VI.—SCOTLAND.

Minutes of Evidence (with Appendices) relating to Scotland. 105th to 110th Days, and 120th and 100th Days: 6th May to 21st June, 1907, and 13th January and 2nd March, 1908: Questions 53,668 to 67,508; 68,567 to 80,946; 94,629 to 105,353.

APPENDIX VOL. VI. A.—INDEX.

Index to Appendix Vol. VI.

APPENDIX VOL. VII.—RURAL CENTRES.—FRIENDLY SOCIETIES, ETC.

Minutes of Evidence (with Appendices) containing the oral and written evidence of witnesses from various rural centres in the South Western, Western, and Eastern Counties, from the Parish of Poplar Borough and from the National Conference of Friendly Societies. 111th to 122nd Days: 3rd July to 7th October, 1907: Questions 67,509 to 77,734.

APPENDIX VOL. VII. A.—INDEX.

Index to Appendix Vol. VII.

APPENDIX VOL. VIII.—UNEMPLOYMENT.

Minutes of Evidence (with Appendices) containing the oral and written evidence of witnesses relating chiefly to the subject of "Unemployment." 123rd to 128th Days: 14th October to 10th December, 1907: Questions 77,735 to 88,606.

APPENDIX VOL. VIII. A.—INDEX.

Index to Appendix Vol. VIII.

APPENDIX VOL. IX.—UNEMPLOYMENT.

Minutes of Evidence (with Appendices) containing the oral and written evidence of further witnesses relating to the subject of "Unemployment," etc. 140th to 146th Days: 12th to 18th Days, and 158th Day: 14th January, 1908, to 11th May, 1908. Questions 88,607 to 94,628; 98,384 to 100,000; 100,001 to 109,860.

APPENDIX VOL. IX. A.—INDEX.

Index to Appendix Vol. IX.

APPENDIX VOL. X.—IRELAND.

Minutes of Evidence (with Appendices) relating to Ireland. 157th and 160th Days: 22nd April and 12th May, 1908: Questions 99,861 to 100,000; 100,001 to 100,968.

APPENDIX VOL. X. A.—INDEX.

Index to Appendix Vol. X.

APPENDIX VOL. XI.—MISCELLANEOUS.

Miscellaneous Papers. Communications from Boards of Guardians and Others, etc., etc.

APPENDIX VOL. XII.—COMMISSIONERS' MEMORANDA.

Reports, Memoranda, and Tables prepared by certain of the Commissioners.

APPENDIX VOL. XIII.—*DIOCEAN REPORTS.*

Diocean Reports on the Methods of administering Charitable Assistance and the extent and intensity of Poverty in England and Wales.

APPENDIX VOL. XIV.—*INVESTIGATORS' REPORTS—MEDICAL RELIEF.*

Report on the Methods and Results of the present system of administering Indoor and Outdoor Poor Law Medical Relief in certain Unions in England and Wales, by Dr. McVick.

APPENDIX VOL. XV.—*INVESTIGATORS' REPORTS—CHARITY.*

Report on the Administrative Relation of Charity and the Poor Law, and the extent and the actual and potential utility of Endowed and Voluntary Charities in England and Scotland, by Mr. A. G. Kay and Mr. H. V. Forrester.

APPENDIX VOL. XVI.—*INVESTIGATORS' REPORTS—INDUSTRIAL AND SANITARY CONDITIONS.*

Reports on the Relation of Industrial and Sanitary Conditions to Pauperism, by Mr. Sted Maitland and Miss R. E. Squire.

APPENDIX VOL. XVII.—*INVESTIGATORS' REPORTS—OUT-RELIEF AND WAGES.*

Reports on the effect of Outdoor Relief on Wages, and the Conditions of Employment, by Mr. THOMAS JONES and Miss WILLIAMS.
